

Imperial College
National Heart and Lung Institute
Myocardial Genetics
Research Associate
Salary: £30,520 - £38,930 per annum

Within the group of Professor R. Knöll (myocardial-genetics), located at the South Kensington Campus, National Heart & Lung Institute, Imperial College, London, UK, the position of a Post Doctoral Fellow is available now, for a period of up to 5 years. The research activities of the group concentrate on mechanosensory processes underlying both the causes and consequences of myocardial failure, hypertrophy, infarction as well as diastolic dysfunction. The group participates in several coordinated programmes, for example in European Union projects such as EUGeneHeart.

The successful candidate should have a diploma, MSc degree or equivalent in a relevant subject area (i.e. biochemistry, biology, molecular biology, pharmacology, medicine or physiology). Moreover, a PhD or MD degree or equivalent is as mandatory as a solid methodological background in cell and molecular biology. Experiences with the generation and/or cardiovascular analysis of knockout or transgenic models would be an additional asset.

Our preferred method of application is online via this website. Please download the following application form and save to your computer. Once completed, please upload your application form prior to submitting your application.
